CAREER OBJECTIVE

Final-year engineering student specializing in CSBS with a strong foundation in software development and programming. Seeking an entry-level opportunity to apply technical skills, problem-solving abilities, and continuous learning in a growth-oriented organization.

EDUCATION

B.Tech in Computer Science and Business Systems

Panimalar Engineering College, Chennai | CGPA: 7.9 / 10 2023 – 2027

Higher Secondary Certificate (Class XII)

Bharathidasan Matriculation Hr Sec School, Kanchipuram | percentage: 82% 2022 – 2023

Secondary School Leaving Certificate (Class X)

Bharathidasan Matriculation Higher Secondary School, Kanchipuram | percentage: 80% 2020 – 2021

TECHNICAL SKILLS

Web Technologies: HTML, CSS.

Programming Languages: Java, JavaScript.

Database: MySQL.

Tools: Git, GitHub, VS Code, Eclipse.

PROJECTS

AI Chatbot Platform

- Developed an AI-powered chatbot with real-time web search, AI image generation, community image sharing, and a credit-based system by integrating Tavily Search API and Google Gemini AI to deliver accurate, real-time responses using live web data.
- Implemented JWT-based authentication, automated daily credit resets, and Stripe-integrated subscription plans (Basic, Pro, and Premium) to ensure secure access control and premium feature management.

Crypto Currency

- Build a cryptocurrency tracking web application using the CoinGecko API to fetch and display real-time market data, enabling users to search and explore detailed information for multiple cryptocurrencies.
- Implemented interactive price trend charts and market analytics, including market capitalization, 24-hour high/low values, and global rankings to provide comprehensive cryptocurrency insights.

INTERNSHIP

Java Programming Intern – Vault of Codes

05th Nov – 05th Dec 2025

- Engineered a secure ATM Banking System using Core Java, incorporating customer authentication, PIN verification, and banking functionalities through Object-Oriented Programming concepts.
- Implemented Exception Handling and File I/O for robust transaction management, while performing testing and debugging to enhance system reliability and user experience.

CERTIFICATION

- Java Programming – Udemy: Completed the beginner-level course covering core Java concepts and practical coding.
- SQL and Relational Databases – Cognitive Class (IBM): Completed a course on relational databases and SQL.
- Technology Job Simulation – Deloitte: Completed practical tasks in coding and development through Forage.
- Networking Basics – Cisco: Completed a course on core networking concepts and Cisco Packet Tracer.
